

# Classification of countries based on health indicators (as of 24/10/2021)

**"Green" countries: countries and territories in which no active circulation of the virus is observed and no variants of concern are identified.** These are the countries of the European area, to which are added Australia, Argentina, Bahrain, Canada, Chile, Hong Kong, Japan, Jordan, Kuwait, Lebanon, New Zealand, Qatar, Saudi Arabia, Rwanda, Saudi Arabia, Senegal, Taiwan, the Union of the Comoros, the United Arab Emirates, Uruguay and Vanuatu.

**"Orange" countries: countries in which there is an active circulation of the virus in controlled proportions, without diffusion of worrying variants.** These are all countries not included in the lists of "green" and "red" countries, for example the United Kingdom, for which a testing obligation of less than 24 hours for unvaccinated people has been added.

**"Red" countries: countries in which active circulation of the virus is observed with the presence of variants of concern.** These countries are: Afghanistan, Brazil, Costa Rica, Cuba, Georgia, Moldova, Montenegro, Pakistan, Russia, Serbia, Suriname and Turkey.
